EXPERIENCE

Codedamn, Bangalore | Remote — Web Developer Intern

November 2022 - Present

building  codedamn.com.

Monogram, New York | Remote — Web developer & Designer

July 2022 - October 2022

Creating and designing Jamstack web apps in Nextjs, Svelte and Tailwind.

IDS Company, Georgia | Remote — Frontend Developer

November 2021 - July 2022

Worked on many internal projects related to Web3, and Jamstack, and created webapps with JS/TS, Sveltekit, Tailwind, Figma, Web3js and Firebase.

Debugged large web apps, created tasks for other developers, provided technical support.

At this job I learned a lot about Web Development, Project Management, and frontend tools.

PROJECTS

ChatRooms

In this website you can create a **private chat room** and share data across **multiple devices**. When you click the button below it will generate a 6 digit room code which can be then used to join the room from different devices. The chat room will **automatically delete after 15min**.

Basically works like Airdrop and works on every device.

Tools used: Svelte + Tailwind, Firebase & Firestore, Vercel, Cloudflare Workers, Cron Job.
